Election/Restriction

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a receptacle.

Group II, claim(s) 20-21, drawn to a method of preparing a liquid product in a receptacle.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of Group I is a receptacle including one or more shut-off sections such as a shut-off boss formed on the outer cup to control flow of liquid and at least one protuberance projects into the ingredient chamber from at least one of the outer and inner cups while the special technical features of Group II is a method of preparing a liquid product in a receptacle including adding to the inner cup liquid for producing the liquid product in conjunction with the ingredient, controlling admission and shut off of flow of liquid without requiring a shut-off boss or at least one protuberance.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. A telephone call was made to Mr. D. Randal Ayers on 3/1/2010 to request an oral election to the above restriction requirement, but did not result in an election being made.
